AI/ML Engineer with 4+ years of experience in Generative AI, LLMs, RAG, and multi-agent systems, including 11 months of industry experience. Experienced in building AI applications, prompt optimization, workflow automations, and production-ready AI systems using Python, LangGraph, FastAPI, and modern LLM frameworks.

Experience

AI/ML Intern July '26 – Oct '26
Leoforce *In-Office*

- Trained and optimized a neural network model, improving accuracy by 10%; refined system prompts to achieve an additional 7% accuracy improvement.

Mavence Apr '26 – Jun '26
n8n Automation Engineer *Remote*

- Built n8n workflows integrating APIs and webhooks, **improving operational efficiency by approx. 60%**.

Education

Newton School of Technology, Rishihood University Aug '24 – May '28
Bachelor of Technology (Artificial Intelligence) — Grade: 7.7/10.0

Projects

Talynx — Autonomous Talent Acquisition Platform May '26
LangGraph, RAG, LLMs, Next.js, FastAPI, MongoDB — Live Demo

- Eliminated recruitment bottlenecks caused by fragmented sourcing, outreach, and evaluation workflows.
- Built an AI-powered ATS using LangGraph agents for autonomous sourcing, personalized outreach, and semantic candidate-role matching.
- Improved hiring efficiency through end-to-end recruitment automation and AI-driven candidate recommendations.

CrisisGrid AI — Multi-Agent Emergency System Jun '26
LangGraph, LLMs, Next.js, FastAPI, NetworkX, WebSockets — Live Demo

- Reduced dispatch delays from unstructured crisis calls and duplicate incidents.
- Built a multi-agent emergency response system for autonomous triage, incident fusion, and resource allocation.
- Enabled real-time severity-based dispatch prioritization and dynamic shortest-path routing for faster response.

Certifications

ET GenAI Hackathon Semi-Finalist May '26
Economic Times — Semi-Finalist in a national GenAI hackathon for developing an AI-driven solution.

HPE Letter of Recommendation Oct '22
Hewlett Packard Enterprise — Outstanding performance in Azure-based ML, NLP, and CV projects.

Applied Deep Learning & Computer Vision Jul '22
IIT Madras (Mechanica) & EduxLabs — Completed hands-on training in deep learning and computer vision using Python

Skills

Languages: Python, TypeScript, JavaScript
AI/ML: LLMs, GenAI, RAG, LangChain, LangGraph, Multi-Agent Systems, NLP, Scikit-learn, NumPy, Pandas, n8n Automation, TensorFlow, PyTorch
Full Stack & Databases: Next.js, React.js, FastAPI, Node.js, Express.js, REST APIs, MongoDB, MySQL, Tailwind CSS
Tools & Testing: Docker, Git, MLOps, Postman, Jira, Jest, Agile & Scrum, Azure, AWS
